Distillation - Perro de San Juan

I. Step #1:

100% Maguey espadin is cuted.

II. Step #2:

The agave is roasted at the stone-lined pit at ground level, that is heated to 900 Celsius degrees.

III. Step #3:

Cook agave is ground by a millstone pulled by horse to extract the mosto and agave juices.

IV. Step #4:

Mosto and agave juices are fermented in oak vats

V. Step #5:

Discontinuous double distillation in copper stills.
