RON PROHIBIDO

RUM

Are a premium rums produced under a solera positioning system with 12 & 15 American oak barrels previously used for raisin wine. Aging in barrels that have been toasted in a traditional way gives this rum the dry tones and pleasant aromas that evoke once forbidden flavors. The truly distinctive taste is from the original rescued Recipe of the XVIII century, which is acquired through the combination of different blended rums aged in used sweet wine barrels resulting a blend of a wide range of flavors and delicious scents.

CONDE DE CUBA

RUM

Ron Conde de Cuba is distilled, aged and bottled in Amancio Rodriguez, a small town in the province of Las Tunas with just 2,000 inhabitants. Located in eastern Cuba, in a land whose climate is ideal for the cultivation of the native sugar cane "Medialuna". The entire integral system is located in the plantation, including the sugar factory to obtain the honey, the distillery, the Ron Sevilla factory and the winery. All this process is reflected in the different labels, making a range of very special products.

NOBUSHI & KENSEI

JAPANESE WHISKY

The Kiyokawa distillery was created with an appreciation for the traditions of the Samurai. Overtime people realized that the water from the Kiyokawa mountains was so pure and crystalline that in combination with a methodical, traditional and high quality process, they could obtain a whisky that could pay homage to the tradition of seeking perfection, so engrained in samurai culture.

MARKETING

In such a competitive world we know that for a brand to stand out, its marketing team has to support as many angles as possible.

The marketing team takes charge of positioning the different brands across social media, world events, on/off trade activations as well as bartender master classes and with fans of the products.

This kind of effort is what we dedicate ourselves to everyday for our brands and clients to stand out.
