

RIVES

## HISTORY

In 1880 Rives was founded by Mr. Augusto Haupold. Initially the company focused on the manufacture and sale of wine and brandy. In 1965, Rives underwent a major reorganization where the grandson of the founder, Augusto Romero Haupold, introduced a full board structure and brought in directors who would help him achieve a new vision of a new dynamic Rives Pitman S.A.

New marketing, promotion and distribution techniques modeled on companies from Northern Europe and USA, which had pioneered successful strategies, were implemented.

From that point on, the company has had tremendous increase of efficiency and sales, while keeping true to the traditions of distilling a quality product that Rives has done throughout it's history of a one hundred and twenty years.

The rigorous high standard controls that Rives has maintained throughout the years allow the company to export their quality results to other global markets where people of the world can taste the delicious nature of a true Spanish made product.

## STATE OF THE ART DESTILLATION TOWERS

We are one of the few companies in Spain using traditional and modern technology in different parts of our production process to achieve the best quality, and one of the few implementing the London Gin production system.

Our water treatment facility provides the purest water, ensuring the best quality product from the very beginning.

Three modern bottling lines with 12.000 bottles per hour capacity.
